DETAILED ACTION

Allowable Subject Matter

1. Claims 1 – 3, 5 – 7, 9 – 11 and 13 are allowed.

The following is an examiner's statement of reasons for allowance:

Applicants have amended independent claims 1, 6 and 9 to include the limitations of previously objected claims 4, 8 and 12 thereby putting claims in condition for allowance.

With respect to independent claims 1, 6 and 9, none of the prior art made of record explicitly teaches or suggests a position detecting circuit wherein the zero voltage moves back and forth in a predetermined direction.

Turner et al. (US 4,055,726), the prior art made of record, teach a position responsive apparatus which comprises a sheet of uniform resistivity having four electrodes in contact therewith around a rectangular area.

Blonder et al. (US 5,113,041), the prior art made of record, teach information processing, inputting and controlling using tablet in combination with writing or positioning implement.

Hasenbalg et al. (US 3,875,331), the prior art made of record, teach an electrostatic digitizing system which includes an X, Y digital tablet and a stylus as a graphic input unit.

However, none of the prior art teaches a position detecting circuit wherein the zero voltage moves back and forth in a predetermined direction.

Therefore, the claims are in condition for allowance.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
